Key Skills

Software Architecture & Design

- DRY, SOLID Principles, Design Patterns, Framework Development, Design Systems

Core Frontend

- JavaScript/TypeScript (Node.js)
- HTML5, CSS3, SASS, SCSS, LESS
- Frontend Frameworks: Angular, Next.js, Nuxt.js

Backend & Tools

- Backend: Node.js, Express.js, NestJS, Laravel
- Build Tools: Webpack, Gulp, Grunt
- Databases: MySQL
- Network Protocols: RESTful API, RPC/gRPC

DevOps & System Administration

- Linux: Arch, Debian (apt), AUR, Pacman, Bash, Zsh
- Server Administration: Nginx, Apache, Postfix, Dovecot, Varnish, CDN, Optimization, SSL
- CI/CD, Docker

Leadership & Management

- Team Leadership
- Hiring & Onboarding
- Performance Management
- Growth Planning
- Stakeholder Management
- Project Management: Agile methodologies

Languages

- Persian (Native), English (Advanced), German (B1)

Work History

Lead Frontend Engineer & Team Lead   Aug 2019 - Present
JIBit

Jibit is a FinTech company, aiming to remove financial complexity through building Fintech infrastructure solutions, Enterprise financial services, Smart payments solutions for startups.

- Spearheaded the design and launch of a proprietary Angular-based frontend framework, resulting in a 40% reduction in project completion time and improved code consistency across all panels.
- Led the migration of legacy web panels to the unified internal framework, ensuring seamless transition and minimal disruption.
- Managed the full employee lifecycle for the frontend team, including recruitment, onboarding, performance management, and offboarding.
- Developed and implemented team growth metrics in collaboration with HR, fostering a high-performing and motivated team.
- Evaluated and analyzed new frontend APIs and technologies to determine their suitability for adoption by the development team.
- Collaborated with product owners to define frontend requirements, establish priorities, and ensure alignment with product goals.

Tech Lead   Jun 2020 - Mar 2022
Raymandan Taly Parseh

Raymandan Taly Parseh is a business consultants company.

- Led software development for client projects, including landing pages, portals, and panels, ensuring high-quality and timely delivery.
- Configured and maintained web and mail servers using Ubuntu, Nginx, MariaDB, Postfix, and Dovecot, ensuring reliable and secure operation.
- Implemented live camera broadcast solutions over the web using RTSP and FFmpeg.
- Optimized server configurations and conducted security audits to mitigate vulnerabilities and enhance cybersecurity.
- Developed and implemented backup and disaster recovery solutions to protect critical data and ensure business continuity.

Lead Frontend Developer   Nov 2018 - Aug 2019
Polito

Poolito was a FinTech startup, providing innovative payment solutions.

- Led the frontend team in the development of admin and client panels using Angular 7, Angular Material, and gRPC.
- Developed responsive landing pages utilizing Bootstrap, Scrollify, jQuery, and Popper.
